

Shutter Talk

Description

The site I want to build is a place for photographers to share their work, ideas, and a place where they can share general information with each other. This will be a discussion forum where users can post, comment, like/dislike other posts etc. Images can be shared via an image URL (if a user wants to post their original content, they'd have to upload via 3rd party such as Imgur and share that URL). This site is for photographers of all levels or anyone that has an interest in art photography.

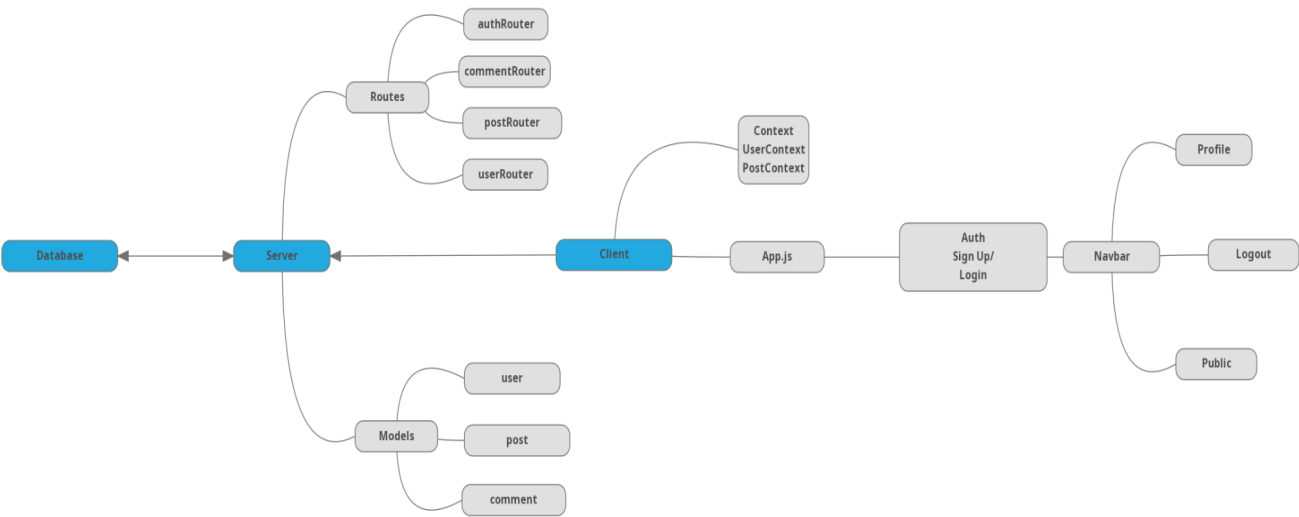

MVP

Users will be able to create an account with a username and password. They can create posts through a *createPostForm* where they will be asked to write a **Title** and a **Description** of their post. They will have an option of adding an *imgUrl* if they want to share the image. User Posts will have a *Like / Dislike* and *Comment* button. Users can also edit and delete their posts and comments.

User Stories

As a photographer, I want to be able to share my work and get criticism on what needs improvement, or what I do well. I would like to get help from others on aspects I'm not proficient with and vice versa, so a comments section would be necessary. Sorting by photography category would be great, but not necessary.
